Award **2 marks** for answers which include **one** of the main contrasts and reference to the text, eg:

- *the webs are all hidden in dark places in verse 1, in the last verse they are still in those same places but the sun has shone on them, so they're in the light;*
- *you don't know what it's all about in part 1, but in part 3 you find out what the secret is;*
- *the poet contrasted darkness with day and the spider making the web with the finished web.*

Award **3 marks** for explaining and exploring at least **two** of the contrasts, eg:

- *In the first part everything is dark and secret with the spider hiding its webs in all sorts of nasty, dark places, so that they can't be seen by the flies. In the last part it shows you how lovely they are in the light, with the sun shining to make them look like strings of diamonds;*
- *The first part is very descriptive in a way that is realistic. The third part is descriptive but leaves things to your imagination. The first part is just a setting whereas the third part is the revealing of the magic.*
